Forecast for Sunday 18 Dec 2022

Weather: Occasional snow showers in the morning, otherwise largely dry. Thickening cloud will bring widespread snow across northeast across the area in the afternoon, this may turn briefly heavy. Snow will turn to rain, some of this freezing for a time, from early evening onwards. Upland gales will lead to drifting of snow for a time.

Chance of cloud-free hill tops above 800m: 60%, best chance until early afternoon across the Ochils and dusk across Upper Deeside

Low Cloud and visibility: Generally good in the morning, briefly dipping poor in any snow showers. Becoming very poor in snow in the afternoon. Cloud lowering to 500 to 700 metres from mid-afternoon onwards.

Met Office Aberdeen Meteorologist's View

Hazardous winter conditions developing by afternoon, gusts to 60 mph by afternoon across the tops. Risk of icy surfaces, as well as melting snow by late evening as freezing levels start to rise.

Forecast for Monday 19 Dec 2022

Weather: A lot of cloud expected through the day along with periods of rain. With a high freezing level snow will be melting and burns becoming swollen at lower elevations. Slippery surfaces. Very windy with extensive cloud on the tops.

Maximum wind: Southerly gales with gusts of 50 to 60 mph on the summits

Chance of cloud-free hill tops above 800m: 20%, best chance across the Ochils for a time in the afternoon

Low Cloud and visibility: Poor in areas of low cloud down to 600 metres, many summits covered in cloud.

Temperature: **Glens:** Plus 2 rising to 10 Celsius
At 800m: Plus 4 Celsius
Freezing level: Well above summits
